

Inventory

The Profitect Inventory (INV) module translates inventory data into item level profit amplification opportunities, insights and trends; which can be correlated with key performance indicators (KPIs) such as damage, shrink and waste to provide actionable solutions to amplify profits. This module enables drill-down to any level in the category/item hierarchy or in the chain/store hierarchy, highlighting significant profit amplification and growth opportunities typically missed by retailers. The module also provides the tools necessary to measure, reduce and prevent stock loss, waste and related fraud.

Benefits

- Accelerate reaction time with actionable solutions for potential margin growth opportunities
- Establish corporate benchmarks and key performance indicators (KPIs) for store-level stock integrity
- Reduce out-of-stock and improve inventory visibility and management
- Reduce losses associated with shrink and waste, factors measured by hard inventory numbers
- Enhance store manager productivity by focusing on profit amplification rather than data collection and processing
- Increase awareness of shrink from site level up to corporate level and create realistic shrink goals.
- Equip teams with action plans to correct inventory related issues with a prioritized list
- Translate the results of inventory counts into UPC level shrink figures and trends, correlating them with damage and waste figures

Turn Store Stock Counts into Profit Amplification and Growth Opportunities

Statistical Analysis of Inventory Trends

Profitect translates the results of inventory counts into UPC-level shrink figures and trends, correlating them with damage and waste figures. Stores and items that are out of line with corporate benchmarks/goals will clearly stand out and can be spotted in seconds with Profitect's intuitive graphic presentation.

Hierarchical Visibility

Profitect offers visibility into inventory data up and down the category/item and chain/store hierarchy. Managers can quickly drill down into any level to focus on the stores, departments and items that present the greatest opportunities for growth and profit amplification.

Building on Industry Best Practices

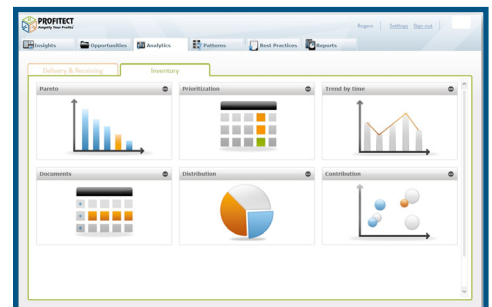

Profitect offers insight from a best practices solution bank compiled over 16 years of retail experience. Rather than simply identifying problems, Profitect's solution enables managers to understand the root causes of potential gaps in profit opportunities and then delivers actionable plans to implement change.

Inventory KPI and Scorecard

The Profitect Inventory module allows users at all levels to establish and track profit amplification metrics and key performance indicators (KPIs), helping the organization continuously improve opportunities for growth and profit amplification. Inventory KPIs include: Pareto analysis, chain benchmarks, waste trends, cycle counts and shrink trends.

Easy to Deploy: Minimizing Time to Value

The modular nature of the Profitect solution allows it to quickly be deployed and integrated with data extracted directly from core systems. With an intuitive user interface, Profitect requires minimal time and resources for implementation, training and management.

With **100% customer success**, Profitect consistently fulfills its commitment to deliver more than **5% profit increase within six months** at major retailers Worldwide.

The Profitect Suite: Paving the Path to Integrated Profit Amplification

The Profitect Inventory module is part of a comprehensive suite of software solutions that enables you to quickly discover and actualize untapped profit opportunities across the entire retail value chain. Profitect's algorithms pinpoint measurable profit optimization and growth opportunities through the identification of value chain margin leakage, shrink, waste, process errors, and operational risks and damages – returning intelligent, prioritized actions for increasing profit be it from POS growth, reduced shrink, margin expansion or added operational efficiencies. For more than 16 years, Profitect's expertise has successfully amplified profits for retailers worldwide and delivered immediate ROI supported by modular, quick, non-disruptive deployment of modern, scalable technology and time-tested best practices.
